

BLUE SKY ANALYTICS

Workforce Intelligence · Labor Risk Advisory

EXECUTIVE BRIEF

SentimentIQTM

Workforce Intelligence Platform

The only workforce assessment built specifically to measure union vulnerability through indirect inference, delivering actionable intelligence before a petition, not after.

WHAT CLIENTS RECEIVE

Intelligence that changes what leadership does next.

A SentimentIQ engagement delivers a six-dimension workforce risk profile, prioritized by facility, department, and supervisor, with a root cause analysis that identifies the specific operational conditions driving vulnerability. Leadership receives a findings brief and a concrete gap-close roadmap with assigned actions and timelines. Not a score. A plan.

ENGAGEMENT DELIVERABLES

Six-Dimension Sentiment Report

Scored across Management Effectiveness, Communication Quality, Pay & Benefits, Safety, Work Experience, and Union Sentiment Index.

Department & Supervisor Ranking

Risk stratified by organizational unit. Identifies exactly where vulnerability is concentrated, not just that it exists.

Root Cause Analysis

Operations-lens diagnosis of the conditions driving low scores. The source, not just the symptom.

Gap-Close Roadmap

Phased action plan with specific owners and timelines. Executable the morning after the debrief.

NLRA Compliant

100% Anonymous

Mobile-Accessible

Distributed Deployment

Real-Time Dashboard

THE SENTIMENTIQ FRAMEWORK

Six dimensions. One complete risk picture.

Every organizing campaign traces back to a breakdown in one or more of these dimensions. SentimentIQ measures all six simultaneously, weighted by their predictive relationship to union organizing interest.

Sample scores shown for illustration. Actual scores reflect your workforce data and are delivered in the full findings report.

HOW IT WORKS

01 Roster Intake

Secure employee roster received from HR. Employee IDs and contact info only.

02 Anonymous Deployment

Each employee receives a unique, untraceable link via SMS or email. No app. No login.

03 14-Day Completion Window

Employees complete on their own time across all shifts, schedules, and locations.

04 Analysis & Findings

Blue Sky processes responses through the SentimentIQ model and delivers a full leadership debrief.

WHY BLUE SKY ANALYTICS

Built for union vulnerability, not general engagement.

Most engagement platforms measure satisfaction. SentimentIQ measures the conditions that produce organizing campaigns.

Indirect inference protects the employer legally.

No direct questions about union sentiment. No unfair labor practice exposure. The methodology does the work.

Distributed by design.

Deployed without email infrastructure, app downloads, or location-specific hardware. Works across any footprint.
